

Éternel Jewelry Necklace Guide

Illustration based on average neck circumference, 11"

www.eternejewelry.com

Collar	12" ^{not shown}	Fits closely around the neck
Choker	14–16"	Fits loosely around the neck
Princess	18"	Falls on the collarbone
Matinée	20"	20"—Just below the collarbone
	22"	22"—At or above the top of the bust
	24"	24"—At or just below the bust center
	26"	26"—At the bottom of the bust
Opera	28–34"	Hangs below the bust
Rope	40–48"	Hangs below the navel

Standard Necklace Lengths

Are even numbers. Odd numbers may be ordered specially.

Necklace Clasps

Are not included in necklace measurements. A clasp increases the length of a necklace by ~0.75".

Consider

- Neck
- Height
- Body
- Face

Stick Your Neck Out

And measure it. Neck size is the most relevant consideration when choosing a shorter necklace. For a collar or choker, go up one size from your neck measurement. For example, a neck circumference of 14" would require a 16" necklace at minimum.

Height

Below 5'4" (162.5 cm)	The V-shape of 16–20" necklaces elongate the neckline to create the impression of tallness.
5'4"–5'7" (162.5–170.0 cm)	Any length.
5'7" (170.0 cm) or taller	Any length, especially longer chains that accentuate a tall frame.

Bust and Body Size

Medium or full chest	To subtly accent the breasts, a 20–22" necklace draws attention just below the collarbone or above the top of the bust.
Small or flat chest	Chains long and thin look graceful.
Overweight	Necklaces intended to fall at the center or bottom of the bust, ~22–24", may hang awkwardly. Chains 18–22" look more flattering.

Face Shape

Oval	Can wear any necklace length gracefully.
Round	26–36" Matinée and Operas elongate the jawline to present a more striking appearance.
Rectangular/oblong	10–16" Collars and Chokers create the impression of a shorter jaw, smoothing the angles of a boxy face.
Heart	10–16" Collars and Chokers diminish a pointy chin.
